

IX Series 2

Door to Door Communication

GENERAL OVERVIEW:

Two-way, door station-to-door station or sub station-to-sub station communication is possible without the use of a master station. However, the ability to trigger door release is unavailable with this configuration.

Configuring the Call Button

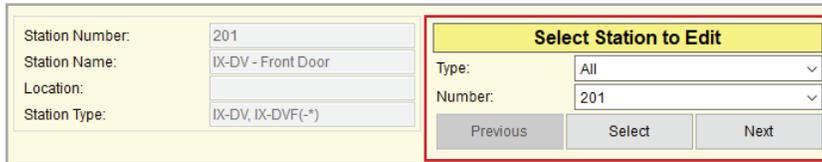

1.1 - Station View

Switch from **Table View** to **Station View** by clicking the Station View button in the top left-hand of Support Tool.

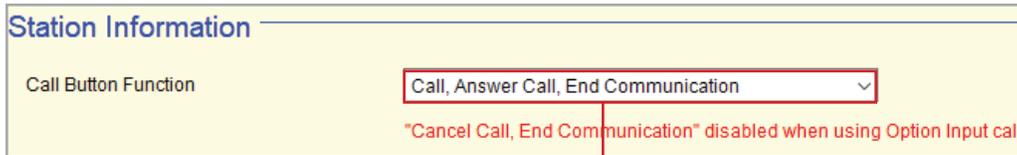

1.2 - Station Information

Expand **Call Settings** and click **Station Information**.

1.3 - Select a Station

Use the drop-down menu to choose the station number of the door station and click **Select**.

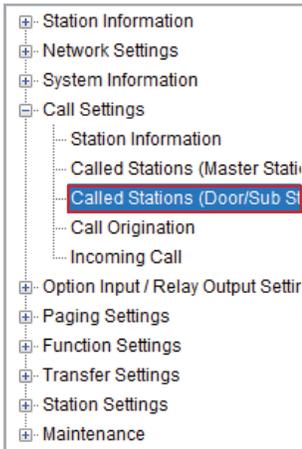

1.4 - Call Button Function

Under **Station Information**, use the drop-down menu for **Call Button Function** and select **Call, Answer Call, End Communication**. This will allow this station to use its call button to place outgoing calls, and answer/end incoming calls.

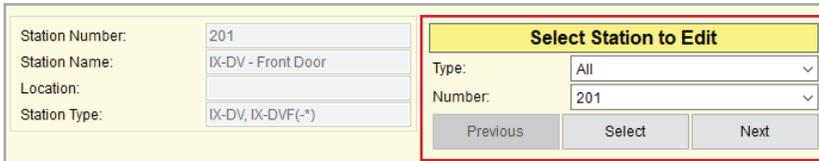

1.5 - Update

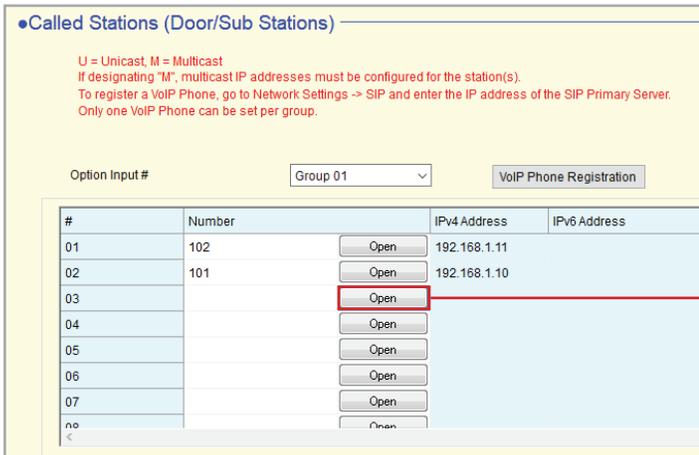

Click the Update button in the top right corner to save changes.

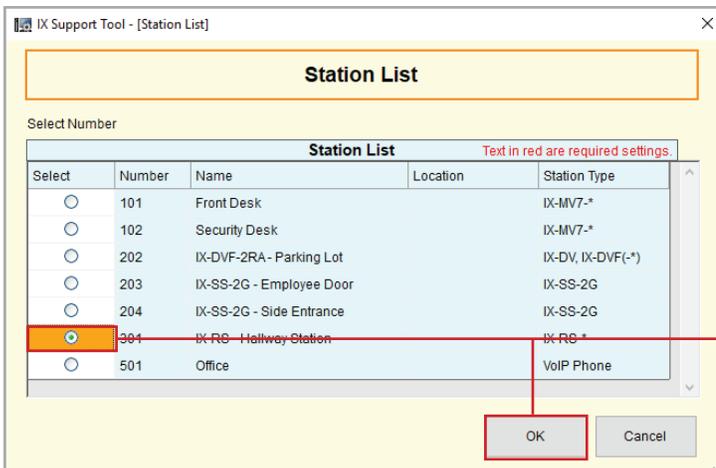

1.6 - Called Stations
Expand **Call Settings** and click **Called Stations (Door/Sub Stations)**.

1.7 - Select a Station
Use the drop-down menu to choose the station number of the door station to be configured and click **Select**.

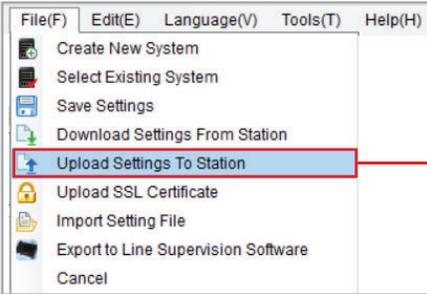

1.8 - Open Station List
Under **Called Station (Door/Sub Stations)**, click the **Open** button of the first available row.

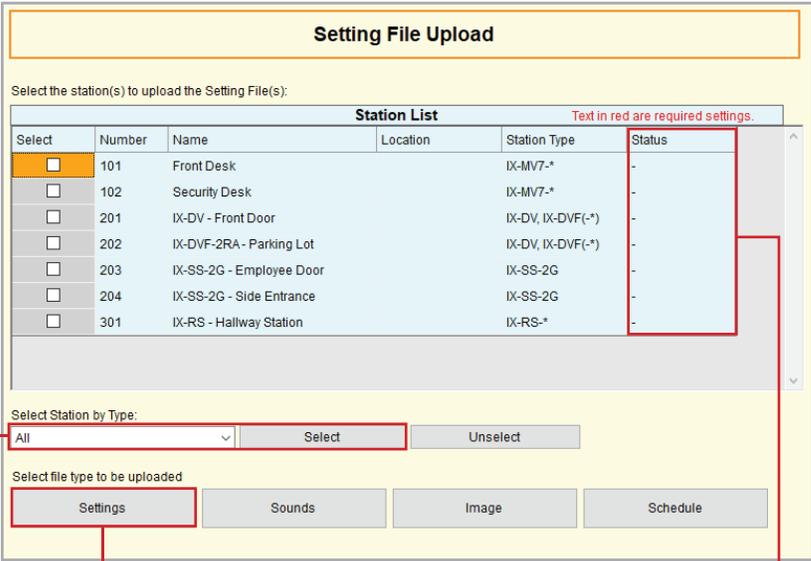

1.9 - Add a Station
Select the radio button of a station to add to the called stations list and click **OK**.

Uploading Settings to Stations

2.1 - Upload Settings to Station
 From the menu bar, select **File** then **Upload Settings to Station**.

2.2 - Select Stations
 Click **Select** to check all stations in the system.

2.3 - Upload Settings
 Click **Settings** to begin the upload process.

2.4 - Confirm Status
 Using the **Status** column confirm, that each station has received its setting file.
